Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. ***The form and legal phraseology*** often used in patent claims, such as "means" and "said," ***should be avoided***. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitations associated with independent claim 1, in lines 6-13; independent claim 8, in lines 5-13; and independent claim 15, in lines 6-10 are not positive limitations because Applicant does ***not provide concrete method steps for performing a function***. For example, Applicant uses

the phrase "when", which in it self is an indefinite term, and Examiner questions what happens after "when." Applicants presented claims are vague and indefinite. Furthermore, the claim language that Applicant is presenting does not provide Examiner with enough information to perform a meaningful search. Examiner is not clear as to what Applicant is claiming as his invention. Claims 2-7, 9-14 and 16-18 depend on claims 1, 8 and 15 respectively therefore claims 2-7, 9-14 and 16-18 are rejected as well.
